Purpose of Study

The importance of digital media in business is growing rapidly. With more and more people coming online and joining social media, the industry is booming like never before. In order to survive, businesses should take advantage of this trend.

This preliminary study has been conducted to assess the digital media presence of companies and standalone service providers in Islamabad. It aims to identify the industries having an online presence and their distribution in the major sectors of the capital city. The study further aims to observe the trends pertaining to website design, website type, Facebook and Google listing account activity.

Way Forward

While, this study gives an overview of the trends observed in the capital city further studies will aim to give a detailed analysis from all over the country. This will include SEO analysis, social media strategy analysis and much more.

Industries Analysed

Industries in Islamabad operating online

Food

Lodging

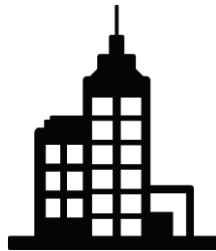

Automotive

Retail

Education

Real Estate

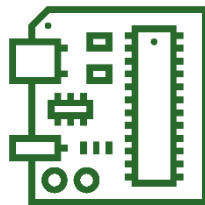

Clothing

IT

Medical

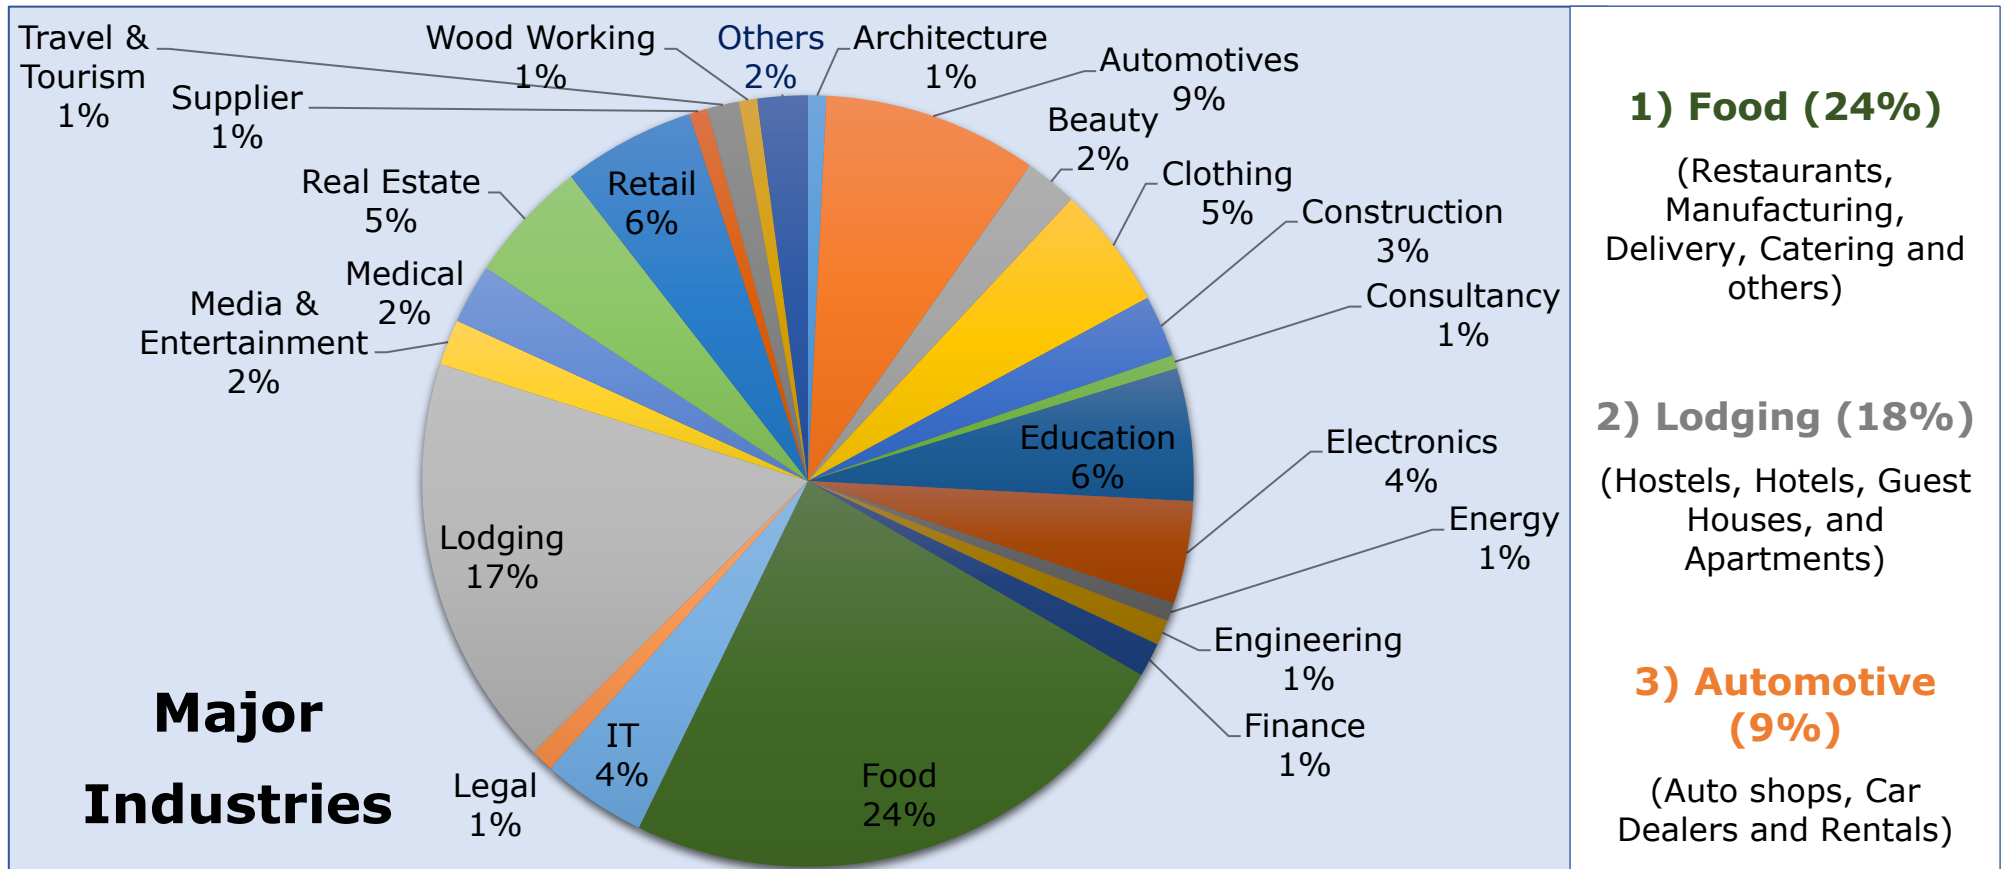

Electronics

Construction

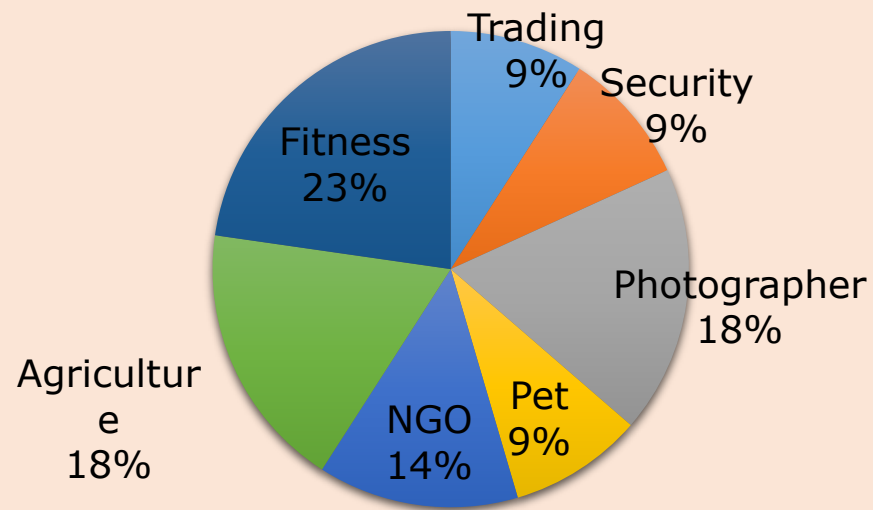

Travel & Tourism

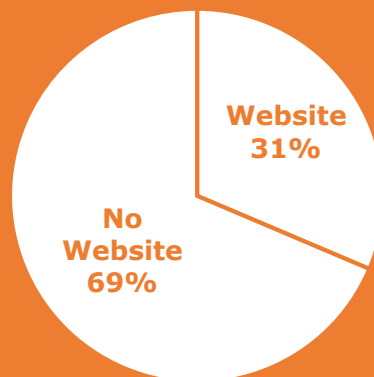

At **24%** the **Food Industry** seems to be the major industry operating online in Islamabad. Followed by **Lodging** at **18%** and the **Automotive** industry seems to be the third largest at **9%**.

FACEBOOK

INDUSTRY WISE OVERVIEW

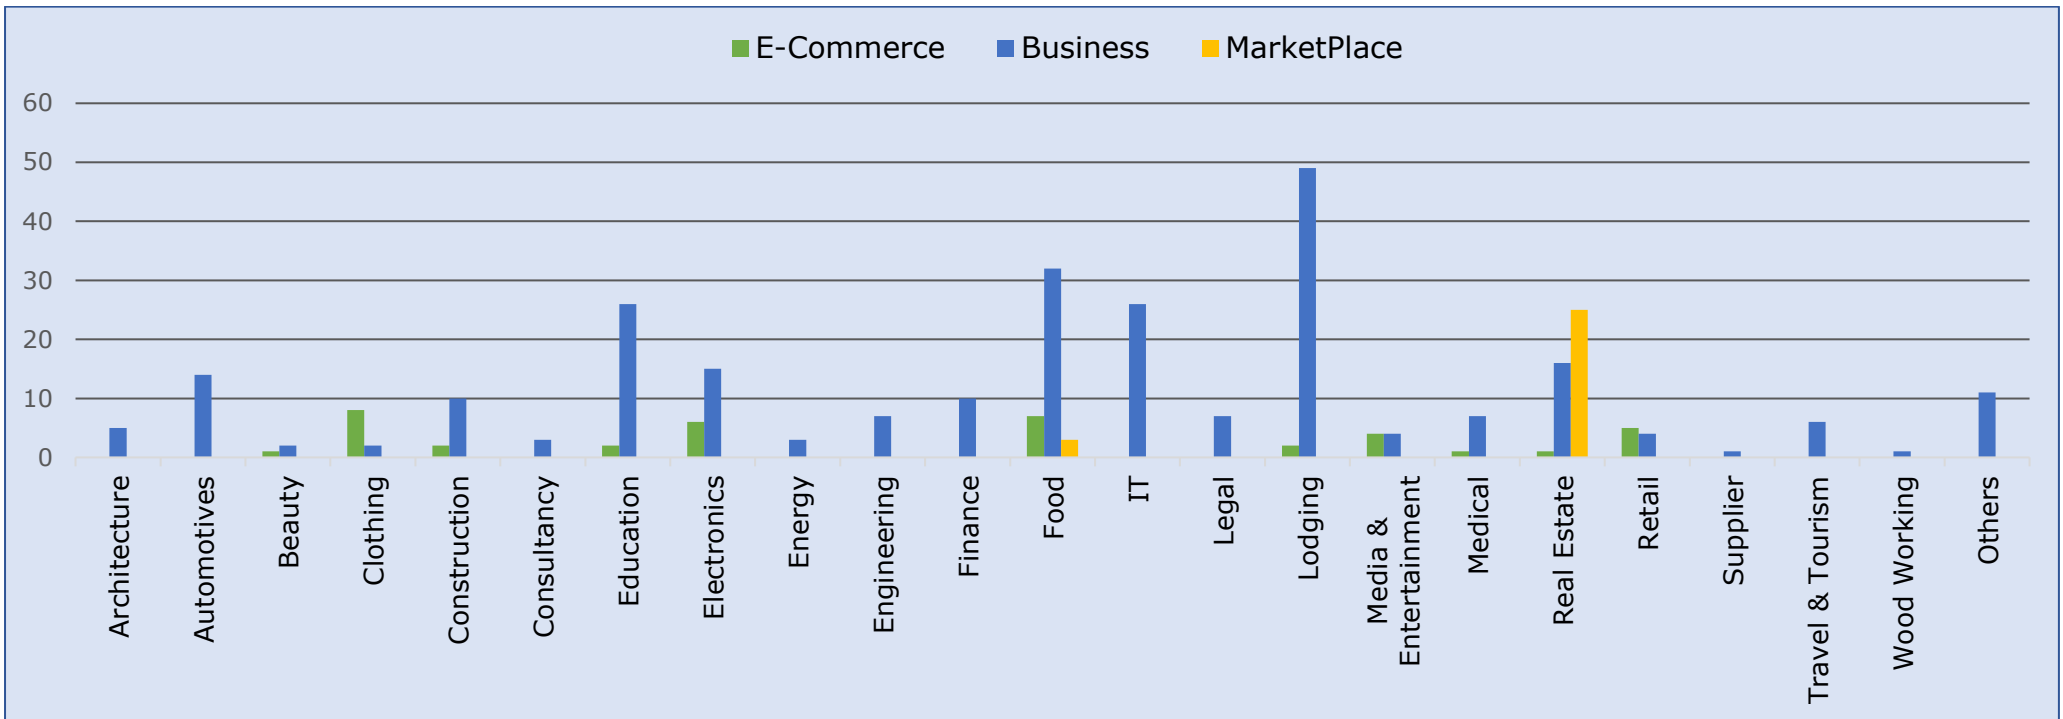

INDUSTRY WISE DISTRIBUTION OF THOSE COMPANIES IN ISLAMABAD THAT HAVE AN ONLINE PRESENCE.

This graph shows the total number of companies in any industry along with the number of companies having websites, Facebook or Google accounts.

Looking at the Food Industry since it is the largest one, we can see that most companies can be found on Google Maps but only **17%** of the companies in this industry have websites and **20%** have Facebook accounts.

Looking at Lodging, most companies are present on google maps and **28%** have websites but only **3.3%** have Facebook accounts. This trend is being observed in most industries but surprisingly in the Real Estate industry **78%** have websites and **59%** have Facebook accounts.

Considering the websites, we have divided them into three main categories:

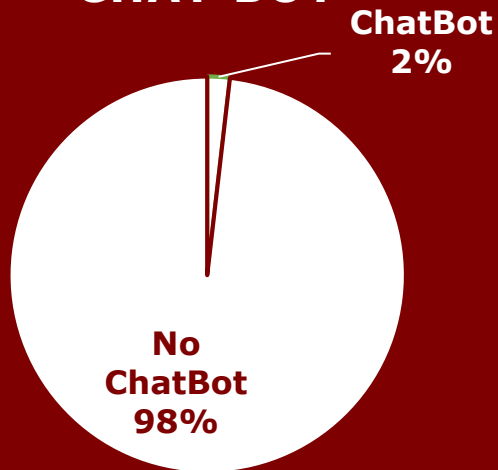

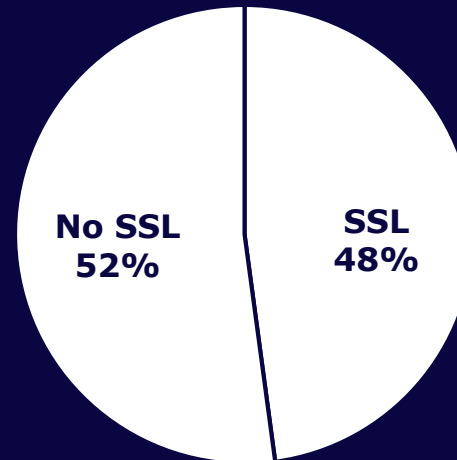

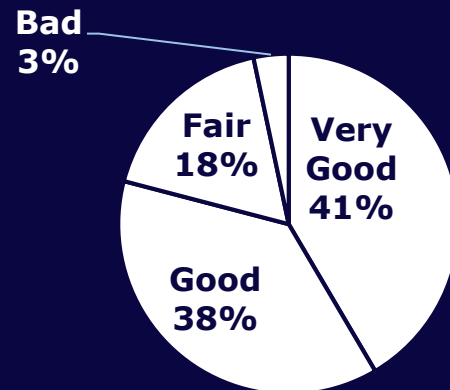

- 1) Business
- 2) E-Commerce
- 3) Market Places

This graph shows the industry wise distribution of the types of websites.

Looking at the Food Industry we saw that **17%** of the companies in this industry have websites. Out of these **76%** are Business sites and **17%** are E-commerce sites.

In the lodging industry, **96%** are business sites and **4%** are E-commerce sites.

Whereas, in the Real Estate industry **59%** are marketplaces and **31%** business sites.

CHAT BOT**SSL****MOBILE FRIENDLINESS**

48% of all websites analysed were secure and **79%** were sufficiently mobile friendly.

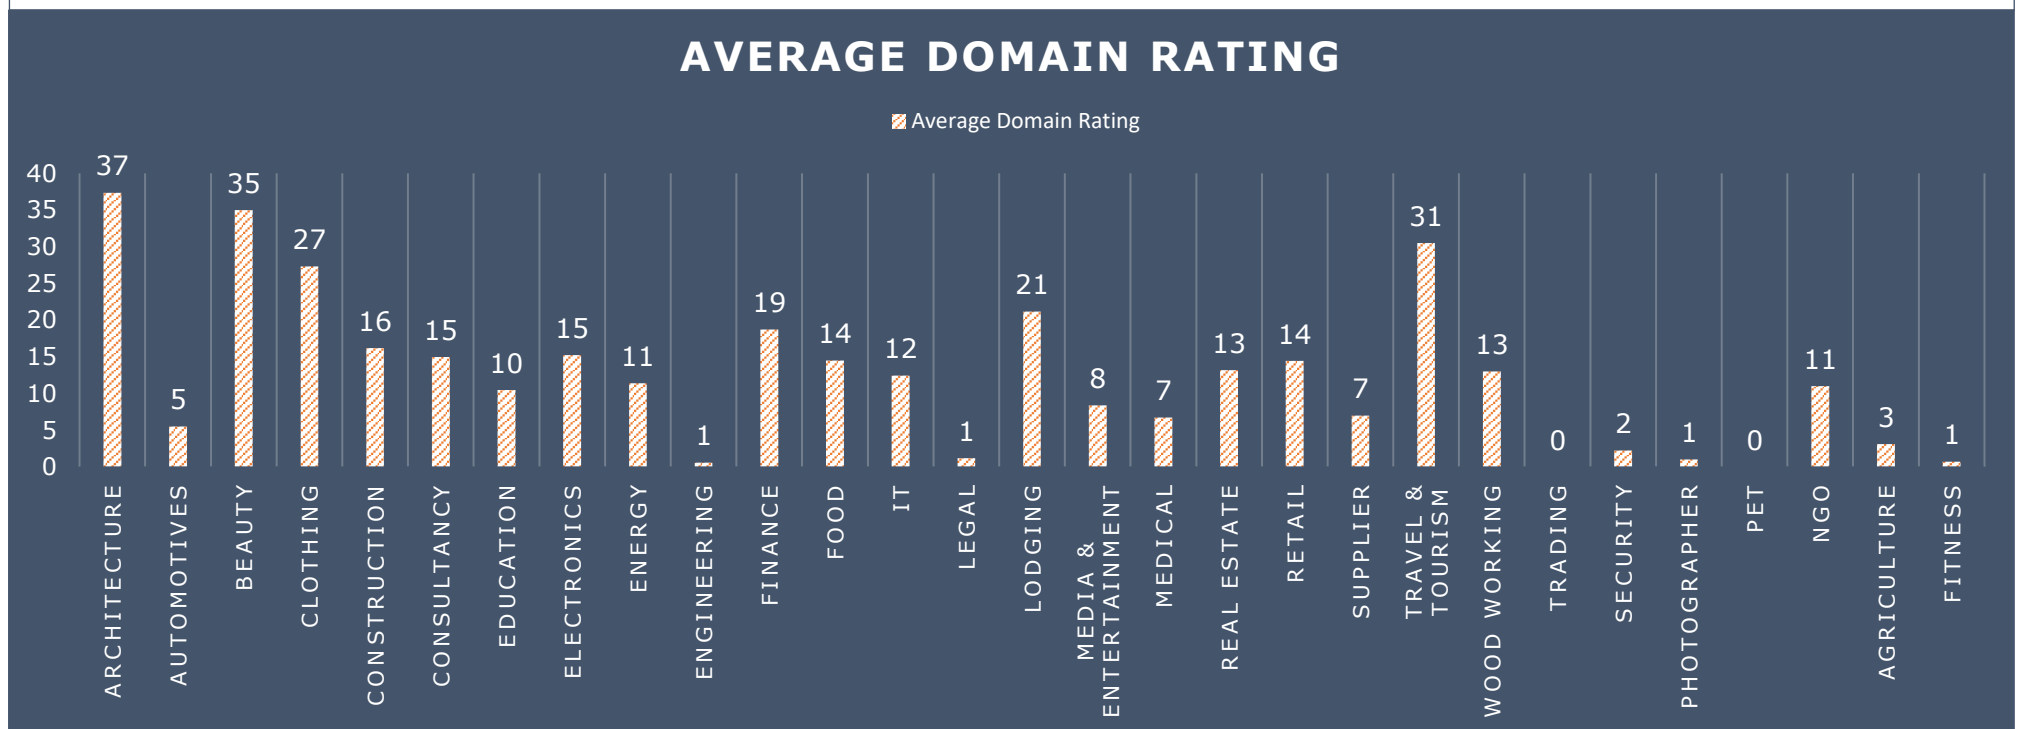

But only **2%** had chat-bots.

Website Overview

Domain Rating

Domain Rating is a proprietary Ahrefs metric that shows the strength of a website's total backlink profile by looking at the quantity and quality of external backlinks to a website. It is measured on a logarithmic scale from 0 to 100.

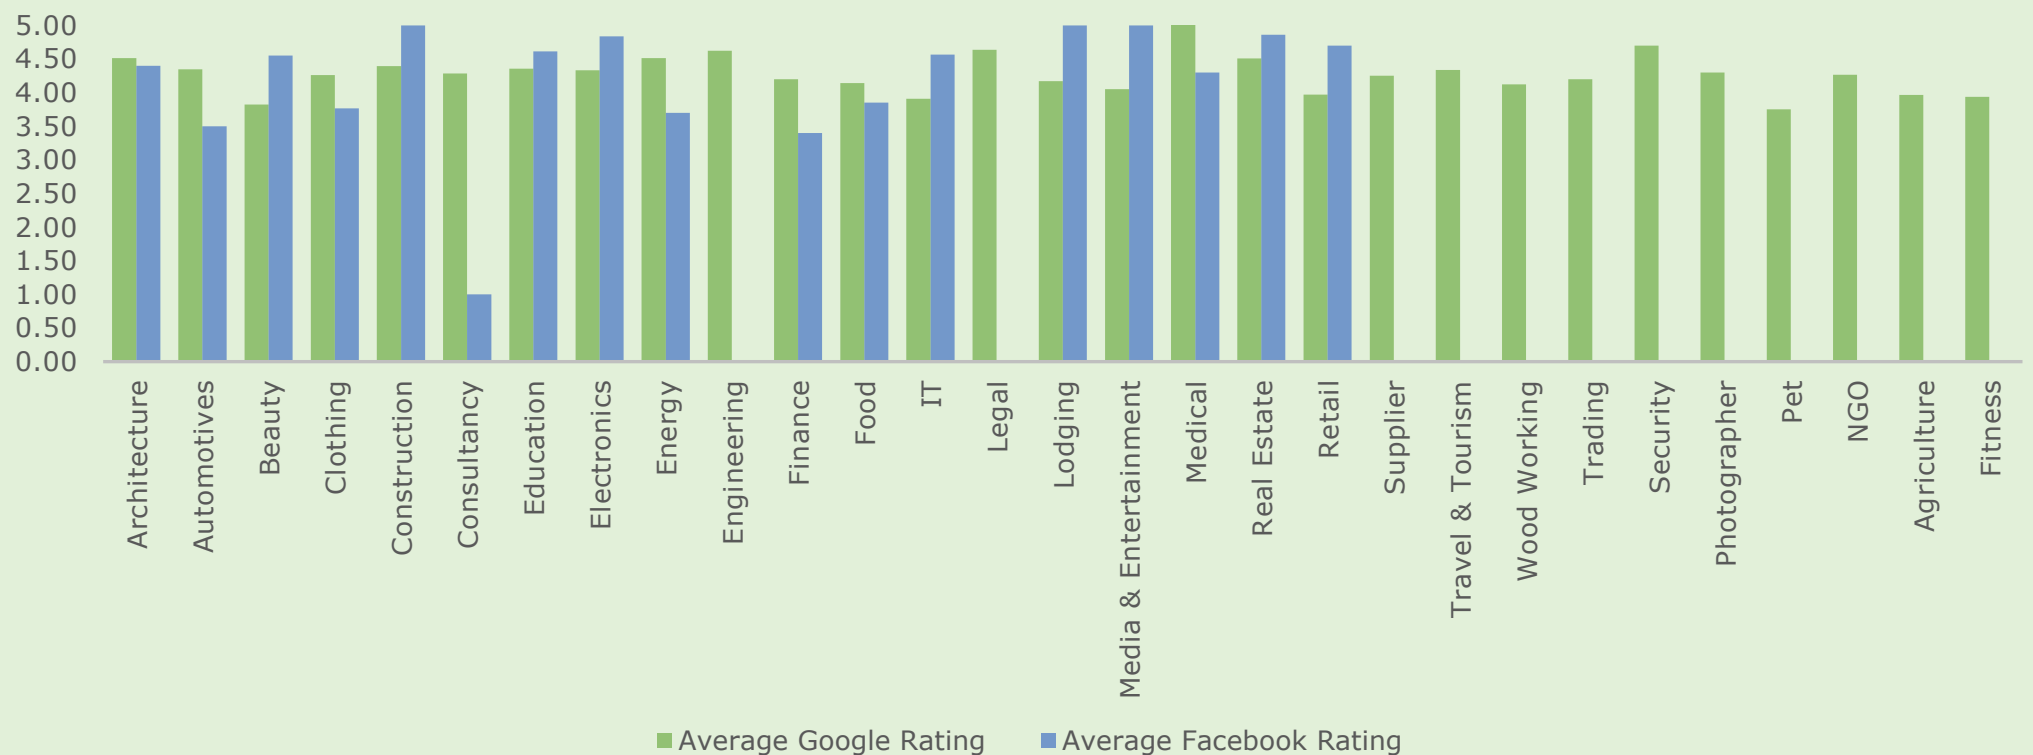

The graph below shows the average domain rating across industries. We can see that the architecture industry has the highest domain rating at 37. At the second place, the beauty industry websites have an average domain rating of 35. On the third number, we see the travel and tourism industry with an average domain rating of 31.

Customer Satisfaction

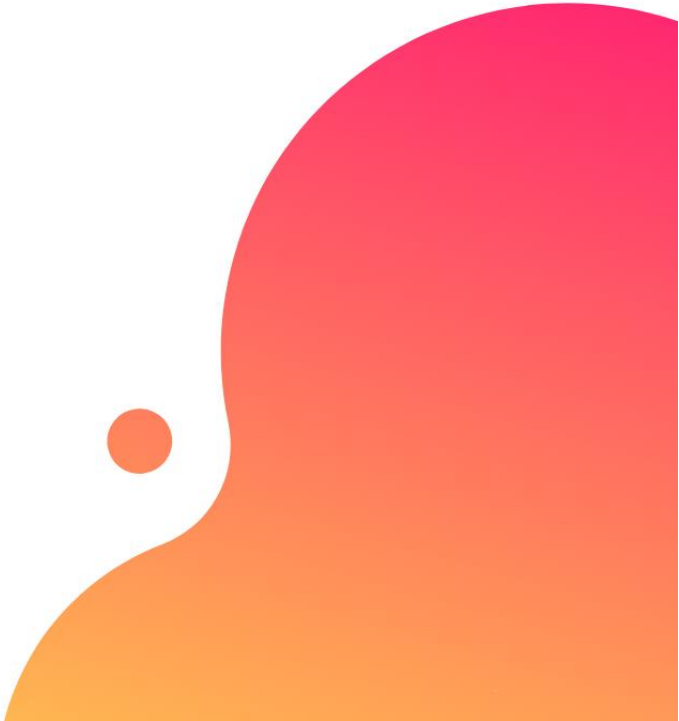

Based on the data pertaining to the Google and Facebook reviews collected, it can be observed that overall customers are satisfied with the services being provided through websites and social media.

Highest ratings were observed in the Medical and Real Estate Industry.
